(54) Method of manufacturing a card

(57) The present invention relates to a method of manufacturing a card, comprising the steps of:

a first step (A) of photographing objects and storing photographed objects as image data;

a second step (B) of storing object data associated with the objects;

a third step (C) of reading out desired image data from the image data and part of the object data corresponding to the desired image data, and synthesizing

the desired image data and the part of the object data;
a fourth step (D) of printing out the synthesized data of the image and the object data on a lower surface of a transparent sheet (124), and

a fifth step (E) of stacking the printed transparent sheet (124) on a card body (131) incorporating a data storage medium (130) and drawn with a common card pattern, and synthesizing the image and object data printed on the transparent sheet with the common card pattern drawn on the card body (131).
